

The problems are available at <http://jan.ucc.nau.edu/ns46/pow>. Paper copies are provided outside the Math Office: Room 107, Adel Mathematics Building. Contact Nándor Sieben (Adel 175) if you have any questions about the problems. Please submit your solutions to the Math Office by Monday 11/30/09. Winning solutions and a summary of scores are at the POTW bulletin board in the Adel Math Building.

Research problems with unknown solutions are marked by (!). These problems might be hard or might be easy, we just do not know. A conjecture or a result about a special case or simply an idea about a possible solution method can be very valuable.

Rational Jumping Turkey

The Rational Unit Jumping Turkey starts at $(0,0)$ on the Cartesian plane, and each step jumps a distance of exactly 1 unit to a point with rational coordinates.

- (a) Can the turkey to reach the point $(1/5, 1/17)$?
- (b) Can the turkey reach the point $(1/4, 0)$?
