

The problems are available at <http://jan.ucc.nau.edu/ns46/pow>. Paper copies are provided outside the Math Office: Room 107, Adel Mathematics Building. Contact Nándor Sieben (Adel 175) if you have any questions about the problems. Please submit your solutions to the Math Office by Monday 10/12/09. Winning solutions and a summary of scores are at the POTW bulletin board in the Adel Math Building.

Research problems with unknown solutions are marked by (!). These problems might be hard or might be easy, we just do not know. A conjecture or a result about a special case or simply an idea about a possible solution method can be very valuable.

Digit Magic

The four-digit numbers 2025 and 3136 have the property that each number is a perfect square and each digit of the second number is 1 more than the corresponding digit of the first number. Find all pairs of five-digit numbers with the same property.
