Prerequisites: Grade of C or better in MAT 238 and MAT 431.

Description: MAT 432C Introduction to Analysis II (3). Topics in the theory and application of real analysis: infinite series, uniform convergence, multivariate analysis, and metric spaces.

Recommended Textbook: Thomson, Bruckner, Elementary Real Analysis. There will be optional notes on the course web site.

Grading:
- Weights: 25% homework, quizzes; 55% tests; 20% final
- Tests: There will be 3 tests. The exact dates will be announced at least a week before the tests in class and on the course web page. Use of graphing calculators or computers are not allowed on the tests. You are responsible for material covered in class whether or not it is in the text. It is important to take notes, and review them after class.
- Comprehensive final exam
- Quiz: A quiz may be given at any time without announcement.
- Homework: Homework will be assigned and collected regularly. Check the course web page for assignments and due dates. Homework is the foundation of your learning. You cannot expect to solve the assigned problems easily. Some problems require a great deal of effort and time. Even if you are unable to solve a problem, the time spent on trying is not wasted. Assignments are due at the beginning of the class. No late homework is accepted but you can turn in homework early. Class attendance is very important. It is recommended to create study groups, but you need to write your solutions from scratch completely on your own. Write out your solutions neatly. Include detailed explanations but be concise. Do not turn in scratch work. Even if I am able to figure out what you think, I can’t give you full credit for a badly written out solution. Solving a problem is half of the battle, the other part is to write it down so that someone without any previous knowledge can understand it. Check your scores regularly on the grade-sheet posted on the web.

Make up tests will be given only in case of verified medical or other emergency which must be documented. You must make a reasonable effort to notify me as soon as you can, preferably before the missed test is given. The best way to contact me is by email.
